To Whom It May Concern:

In December 2005 Ms. Ozlem Olcay Introduced Omega Lubricants to us. We had problems in the lubricants used in the oven the grease we were using was dripping which caused loss in time and spare parts .

Miss Olcay offerd the Omega 78 the extreme high temperature grease which ended our problems in this place.

We are also using Omega 585 the synthetic food grade chain and gear box lubricant in our Gear boxes and chains and Omega 58 Super food grade grease in our bearing.

We are very satisfied with these products and the service given by your representative.

Regards
